## RATIONALE

TRIS Rating affirms the company rating on Prinsiri PLC (PRIN) and the ratings on PRIN's existing senior unsecured debentures at "BBB-", with a "stable" outlook. At the same time, we assign the rating of "BBB-" to PRIN's proposed issue of up to THB700 million senior unsecured debentures due within three years and six months. The proceeds from the new debentures are intended to be used for debt repayments and working capital.

The ratings reflect the company's modest business scale, moderately high financial leverage, and tight liquidity. However, the ratings are supported by its steady performance and satisfactory profit margin. The ratings also take into consideration our concerns over the reimposition of stringent loan-to-value (LTV) rules in 2023, interest rate hikes, and high household debts which could negatively impact housing demand in the short to medium term.

PRIN's operating performance in the first nine months of 2023 (9M23) was slightly softer than our expectations due mainly to lower sales of single-detached house (SDH) units than our target. PRIN reported total operating revenue of THB1.8 billion in 9M23, achieving around 70% of our full-year target of THB2.6 billion. Nonetheless, PRIN's earnings before interest, taxes, depreciation, and amortization (EBITDA) in 9M23 remained satisfactory, with an EBITDA margin of 27%.

We expect PRIN's operating performance in 2024-2025 to improve slightly amid an expected recovery in the domestic economy. We project the company's revenue to increase by 5%-7% per annum to THB2.6-THB3.0 billion. Its EBITDA is expected to range from THB600-THB700 million per annum with an EBITDA margin of 23%-25% in 2024-2025.

As of December 2023, PRIN had 41 active projects. The value of unsold units (including built and un-built units) was around THB13 billion, comprising townhouses (THs) (47%), SDHs and semi-detached houses (DHs) (44%), and condominiums (9%). At the end of December 2023, the company's backlog was THB223 million, all of which is expected to be recognized as revenue in 2024.

PRIN's debt level has headed upward following its continued project expansion. Its debt to capitalization ratio was 51% as of September 2023, up from 45%-48% in 2021-2022. We expect the company to sustain its debt to capitalization ratio at around 50% over the forecast period. With projected modest revenue growth and a sustained EBITDA margin, the company should be able to maintain its net debt to EBITDA ratio at 7-8 times and its funds from operations (FFO) to debt ratio at 5%-6% in 2024-2025.

At the end of September 2023, PRIN's total consolidated debt was THB5.7 billion. Priority debt, including secured debt of the parent company and total debt of its operating subsidiaries, was THB2.3 billion. This translates to a priority debt to total consolidated debt ratio of 40%.

We assess PRIN's liquidity to be tight but manageable over the next 12 months. As of September 2023, the company had maturing debts over the next 12 months totaling THB2.3 billion. We estimate PRIN's net working capital outflow for land and construction to total around THB2 billion in 2023 and the dividend payment to be 30% of net profit. At the end of September 2023, PRIN's sources of liquidity included cash on hand of around THB200 million and undrawn unconditional

**CreditUpdate**, reviews ratings of companies or debt issues that have already been rated by TRIS Rating. The CreditUpdate occurs when new debt instruments are issued or if significant events have taken place that may impact a company's current ratings or when current ratings are cancelled. The CreditUpdate announces whether a rating has been "upgraded," "downgraded," "affirmed" or "cancelled." The update includes information to supplement the previously published ratings.

Credit Updates are part of TRIS Rating's monitoring process. TRIS Rating monitors every rating it assigns until either the debt instrument matures or the rating contract ends. To keep the public informed of changing situations, TRIS Rating periodically issues announcements about the credit ratings it monitors.

committed credit facilities of around THB150 million. We forecast FFO to be around THB300 million in the next 12 months. PRIN also has unencumbered land banks worth THB1.8 billion at cost, which can be pledged as collaterals for new credit facilities, if needed.

The financial covenants on PRIN's debt obligations require the company to keep its interest-bearing debt to equity (IBD/E) ratio below 2.5 times and the total liabilities to total equity (D/E) ratio below 2 times. The ratios at the end of September 2023 were 1.1 times and 1.3 times, respectively. We believe the company should have no difficulty complying with the financial covenants over the next 12 months.

---

## **RATING OUTLOOK**

The "stable" outlook reflects our expectation that PRIN will be able to deliver operating performance and sustain its financial profile as per our targets. We expect PRIN's EBITDA margin to remain in the 23%-25% range and the debt to capitalization ratio to hover around 50%. We also expect the company's FFO to debt ratio to remain above 5% over the forecast period.

---

## **RATING SENSITIVITIES**

PRIN's credit upside would materialize if the company can significantly enlarge its revenue and earnings bases, while maintaining its financial profile at the current level. Conversely, the ratings and/or outlook could be revised downward if its operating performance and/or financial profile deteriorates materially from our base-case forecast.
