RATIONALE

TRIS Rating affirms the company rating of Carabao Group PLC (CBG) at "A-". At the same time, TRIS Rating assigns the rating of "A-" to CBG's proposed issue of up to Bt3,000 million in senior unsecured debentures. The proceeds from the new debentures will be mainly utilized to restructure debt obligations for improved liquidity and reduced financing costs.

The ratings reflect CBG's well-recognized brand name and solid market position in the energy drink market in Thailand, extensive distribution network, and moderate but rising level of debt. The ratings are partially offset by CBG's dependence on a limited range of products and the uncertainty of the expansion efforts in the United Kingdom (UK) which might put pressure on profitability over the next few years.

CBG's revenue rose sharply to Bt12,904 million in 2017, an increase of 29% from last year, driven by a rise in exports sales volume, especially to CLMV markets and China. In the first quarter of 2018, revenue was Bt3,350 million, up 25% from the same period last year. The growth was driven by overseas markets, especially sales in the CLMV region that grew a faster-than-expected 81% year-on-year. Despite the rise in revenue, sales in China and the UK were lower than expected as a result of intense competition in those two markets.

The adjusted operating margin (operating income before depreciation and amortization as a percentage of revenue) dropped from 18.9% in 2016 to 10.2% in 2017 and 9.4% in the first quarter of 2018. Profitability deteriorated due to higher selling and marketing expense and a lower gross margin in the domestic segment. Selling and marketing expenses rose because CBG paid to sponsor football teams and a football tournament in the UK and undertook marketing activities in the UK. Based on payment terms in sponsorship agreements, sponsorship fees will reach the peak in 2018 and reduce in subsequent years. In domestic market, the gross margin fell due to rises in the prices of raw materials of packaging and energy drinks.

Leverage is growing due to the sizable investments needed to expand the capacity to produce energy drinks and packaging. Marketing expenses have risen substantially in an effort to penetrate international markets. The adjusted debt to capitalization ratio was 40% at the end of the first quarter of 2018, up from 15% in 2016 and 34% in 2017. Going forward, leverage is expected to peak in 2018, then gradually fall in the following years.

RATING OUTLOOK

The "stable" outlook reflects the expectation that CBG will be able to maintain its market position in the domestic market, while expanding successfully in the UK market as planned. The company operating performance and leverage are expected to improve in 2019 after possible deterioration in 2018.

RATING SENSITIVITIES

A rating upgrade is limited in the near term given the sizable investments and uncertainty around the expansion effort in the UK. A rating downgrade would occur if the operating performance is weaker than expected for a prolonged period of time or if the company adopts more aggressive financial policies.

CreditUpdate, reviews ratings of companies or debt issues that have already been rated by TRIS Rating. The CreditUpdate occurs when new debt instruments are issued or if significant events have taken place that may impact a company's current ratings or when current ratings are cancelled. The CreditUpdate announces whether a rating has been "upgraded," "downgraded," "affirmed" or "cancelled." The update includes information to supplement the previously published ratings.

Credit Updates are part of TRIS Rating's monitoring process. TRIS Rating monitors every rating it assigns until either the debt instrument matures or the rating contract ends. To keep the public informed of changing situations, TRIS Rating periodically issues announcements about the credit ratings it monitors.
